

With its campsite in the north of Germany, the VCP shows an opportunity to make **sustainability and ecology** conceivable for children and adolescents. They live in faultless nature and learn how to deal cautiously with water, animals and plants.

The campsite is awarded by the World Organization of the Scout Movement (WOSM) as a "scences center", as a sustained and ecological study center in an awesome landscape.

The **grounds** are divided into different sections providing plenty of space for 800 children and adolescents with up to 100 tents. Two sanitary faculties are containing washing rooms and sanitation facilities (handicapped accessible). Camp fireplaces, large wood supplies and building timber complete the infrastructure.

The **swimming area** with two footbridges is a bit further away from the camping areas. Parking lots for Busses and cars are provided. Several canoes and a sailing boat can be borrowed.

With the **canoe station** the VCP is a partner to the INTERRECIIC-project "Rural waters – tourism on the water", and it is acknowledged as a DKV canoe station.

### Arrival:

Easily accessible by train to Neuruppin than by bus via Rheinsberg to Großzerlang. Another possibility is to travel by boat.

# VCP Guide and Scout center Großzerlang

The campsite in the north of Germany ...

Welcome to the VCP Guide and Scout center at Großzerlang!

To be able to **reach a campsite also by water** is not so usual. However, this is one of the special features of our campsite at Großzerlang.

The **twelve-hectare-sized site** is located at the Pälitz lake that is belonging to the Mecklenburg Lake District. It offers pure water amusement in form of swimming, sailing, paddling ...

Großzerlang is located in the German Federal State of **Brandenburg**, about 100 kilometers north-westward of Berlin. The nearest bigger villages are worth-seeing Rheinsberg and Neuruppin.

## Experience nature:

The VCP Guide and Scout center is **part of the national park** Stechlin-Ruppiner-Land.

It combines many different landscapes, woods and meadows, big and small lakes, meadow woods and sandy areas. The reeds at the shore are an area of retreat and brood places for aquatic birds and amphibians.

Many rare species live around the lakes.

The **love for nature** is a very special passion of the scouts. At the campsite you can experience this with all senses. We built accommodations for lizards and rare insects like bee hotels and a dry wall.

Bats live in an old tower and rare pome fruit trees were planted on a scattered fruit meadow.
